## AGENDA

Energy Efficiency Policy Committee

October 1, 2015

3:30 pm – 4:30 p.m.

Call-in: (605) 475-3200

Access Code: 1017106#

1. [AB 802](#).  
In addition to requiring the utilities to provide whole-building energy usage data for commercial buildings and residential buildings with five or more accounts, it addresses the baseline issue. It's gotten very little play, but this is huge! The bill allows utilities to provide incentives for actions and measures that bring buildings into conformity with, or exceed, Title 24.
2. [EE Rolling Portfolio decision](#).  
It was held to Oct. 1, so by the time of our meeting it could be adopted. It is possible that the decision considered will be different than the link above.
3. [Distribution Resources Plans](#).  
See memo. There's a prehearing conference Jody will be attending Wednesday, so an update will be timely.
4. Integrated Demand Side Resources.  
The CPUC on Sept. 17 adopted [Decision 15-09-022](#) on the definition and goal of the proceeding (see memo). This is another win for the LGSEC, as the goal recognizes the importance of climate objectives.
5. Energy Efficiency EM&V Studies.  
Any updates from members? Draft studies expected end of September.
6. Other – please suggest.
