LOCAL GOVERNMENT SUSTAINABLE ENERGY COALITION

Vision and Mission

VISION

Local governments are a leading and innovative force in achieving energy and climate goals to create resilient and environmentally responsible communities across California.

MISSION

The Local Government Sustainable Energy Coalition catalyzes local government leadership and innovation through ongoing dialogue and action to enhance current roles and develop new roles for local government in California's sustainable energy future.

LGSEC provides a collective voice for its city, county and local agency members on statewide policy and program issues for sustainable energy, energy efficiency, local renewable power and related issues.

LGSEC elevates the role of local governments in shaping California's energy future implementation of innovation, regulatory intervention and action, coordination of local governments' technical expertise, forums for networking, local and regional programs implementation, and development of local leadership.
